

Kullstatistik 2020

Denna lista är sammanställd för att ge dig en överblick av samtliga kullar som registrerades hos Svenska Kennelklubben (SKK) under 2020. Statistiken kommer från SKK och utländska hundar kan ha hälsoundersökningar, mentalbeskrivning, arbets- och utställningsmeriter som inte kommer med i denna lista.

Utöver SKK:s grundkrav för registrering har SASK tagit fram två nivåer för valphänvisning för att på ett enkelt sätt visa dig vilka meriter som föräldradjuren bör ha uppnått, för att i möjligaste mån bidra till att bevara en såväl kroppsligt som mentalt sund aussie. Du hittar dem i sin helhet på sask.nu.

Grå markering innebär att SASK:s grundläggande krav uppfylls vid beräknat parningsdatum (hälsa, ålder, mentalitet).

Gul markering innebär att SASK:s samtliga krav uppfylls vid beräknat parningsdatum (inkl arbets- och exteriörmerit)

De kullar och kennelnamn som är färgmarkerade visar vilken hänvisning kullen fått/skulle fått och individer är markerade i den färg de uppnår.

Resultat och hälsobedömningar angivna nedan är enligt SASKs grundläggande (HD, Ögon, Ålder, MH) eller samtliga (Arbetsmerit, Exteriör) krav. Resultat vid beräknat datum för parning är angivna där tidpunkt för parning är beräknad utifrån dräktighet på 58 dygn.

24,5 % av kullarna 2020 uppfyller minst SASKs grundläggande krav (26 st av 106 st)

7,5 % av kullarna 2020 uppfyller samtliga krav (8 st av 106 st)

*SASK uppfödare (står med på uppfödarlistan)

undantagen = Utländska hundar undantas från regler kring MH för att gynnas av genetiskt utbyte och räknas därför i denna statistik som att de uppfyller grundläggande krav avseende MH.
